PROFESSIONAL EXPERIENCE

Accenture

Enterprise Architect Analyst

April 2025 – Present

Enterprise Architect Intern

March 2026 – Present

April 2025 – February 2026

- Specialized in backend development with **Java and Spring Boot**, using **MongoDB** and **Apache Kafka** to build scalable and event-driven architectures
- I work in **Agile Scrum** teams, actively contributing both to software development and to the definition of technical and architectural solutions
- Design and implementation of **multi-agent** architectures, using the **MCP** protocol
- Collaboration with **Product Owners** for solutioning and translating business requirements into robust and scalable application solutions

EDUCATION AND TRAINING

Politecnico di Torino

2023 - March 2026

Master's Degree in Computer Engineering, Software track - graduated with 108

- Main courses: Computer Systems Architectures, Data Science and Database Technologies, Information Systems, Formal Languages and Compilers, Systems Programming, Software Engineering, Software Engineering II

Significant projects:

- Master's thesis : MyUniversity
 - Description: design and development of a university portal based on a microservices architecture, with a comparative performance analysis against an as-is monolithic architecture.
 - Technologies: Java, Spring, Kafka, Docker, Kubernetes.
- [Kiruna eXplorer](#)
 - Description: web application developed to assist architects and urban sector professionals in the relocation process of the city of Kiruna, located in northern Sweden, where, due to a phenomenon related to iron ore mining, it became necessary to move a significant part of its structures to a new location. This project provides a digital tool to explore and support the various aspects of this complex relocation process.
 - Technologies: Typescript, React, SCSS, Google Cloud API Maps
- [Eating The World](#)
 - Description: Application designed for lovers of traditional cuisine and travel. Our mission is to allow users to discover traditional dishes from different cultures around the world while exploring new places. With this app, you can immerse yourself in local culinary authenticity and enjoy a unique experience in every journey.
 - Technologies: Typescript, React Native, CSS, Expo Go, Google Cloud API Maps.

University of Florence

2018 - 2023

Bachelor's Degree in Computer Engineering

- Thesis: "Sensing and distributed processing applications in drone networks through the Software Defined Networking principle"

Antonio Gramsci Scientific High School

2018

Scientific High School Diploma

- School-work experience at Opificio delle Pietre Dure as a tour guide
- School-work experience assisting the Chille della Bilanza company in reconstructing the database of the San Salvi psychiatric hospital in Florence

TECHNICAL SKILLS

- Advanced: Java, MongoDB, Apache Kafka, Kubernetes, Docker, Typescript, Javascript, Git
- Intermediate: Python, C++, Kotlin, SQL, HTML5, CSS/SCSS, Rust

LANGUAGES

- English: B2 (IELTS 6.5)
